(54) Title: SYSTEM AND METHOD OF INTEGRATED OPERATIONS CONTROL, MANAGEMENT AND E-GOVERNANCE FOR LAW ENFORCEMENT AGENCIES AND POLICE DEPARTMENTS

(57) Abstract: The instant invention relates to integrated system and method of achieving operations control, management and e-Governance for law enforcement agencies and police departments using modern information technology based solution covering all aspects of the functioning of law enforcement agencies and police departments both at the state level and at the national level. By means of the electronic platform being created for data storage and operations, the instant invention facilitates extremely rapid and reliable flow of vital data between law enforcement agencies of different jurisdictions. The instant invention greatly simplifies operational control, investigation of crime, maintenance of records and formulation of strategy in response to emerging law and order situations. The instant invention provides automated "search and find" capabilities for fingerprints, facial portrait and crime data regardless of geographical boundaries of States/ UTs, which is achieved with extreme speed and accuracy with the support of userfriendly hardware, software and bespoke systems specifically developed under the present invention. It also provides for cybercrime management to mitigate cybercrime in its various forms and also to detect such crimes with great speed and reliability. The other features include unique identification and numbering system for crimes, for criminals/ suspects, for police stations, for prison management, for interface between law enforcement agencies and other Government departments, for statistical analysis and reporting with graphic elements and for web-based operations of law enforcement agencies and police departments covering all facets of their activities at both macro and micro level assuring utmost security of data storage and transmission, facile handling of all systems under the present invention by officials of law enforcement agencies and police departments with minimum training and safe, long-term storage of all data in a secure environment.

A. CLASSIFICATION OF SUBJECT MATTER

INV. G06Q10/00
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
G06Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, INSPEC, WPI Data.

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family
