(54) Title: DIAGNOSIS METHOD OF ALCOHOLIC OR NON-ALCOHOLIC STEATO-HEPATITIS USING BIOCHEMICAL MARKERS

(57) Abstract: The present invention is drawn to a new diagnosis method for detecting the extent of alcoholic or non-alcoholic steato-hepatitis in a patient, in particular in a patient suffering from a disease involving alcoholic or non-alcoholic steato-hepatitis or who already had a positive diagnosis test of liver fibrosis and/or presence of liver necroinflammatory lesions, by using the serum concentration of easily detectable biological markers. The invention is also drawn to diagnosis kits for the implementation of the method.
