(54) **household cooking appliance comprising a suspended unit**

(57) A cooking appliance comprises a suspended unit (8) configured to serve as an oven and a hood, having a casing (20), a muffle at least partially defining a cooking chamber (31), means for heating the cooking chamber (11, 35, 36) and support means (41, 42, 43a, 45). The casing (20) has a lower opening substantially aligned or concentric with respect to a lower opening of the muffle and the cooking chamber (31) is in fluid communication with a duct (50) which connects a fumes outlet (51) of the muffle (30) to a suctioning group (6). The support means (41, 42, 43a, 45) are prearranged such that the suspended unit (8) is adapted to be displaced between a raised and a lowered position with respect to a support surface (2, 10a), where in the lowered position the lower openings of the casing (20) and of the muffle are substantially closed by the means of a support surface (2, 10a). The duct (50) is adapted to vary in configuration, when the suspended unit (8) is displaced between the raised and lowered position.

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 09 15 7655

5 This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
