(54) **Title:** ELECTRIC ENERGY AUGMENTER

Fig 1

(57) **Abstract:** The present Invention is designed with 13 deferent type of method and increase in different ratio in ascending order. The present Invention driven with different type of Electric Motor, (like Squirrel cage induction motor, Traction motor, Permanent Magnet motor, Brushless DC motor etc.), The electric motor directs the input shaft which rotates Internal parts of specially devel-oped gear box, which have three output shaft, one is useful for regenerating the electric pow-er into DC form (as per requirement), 2nd output shaft coupled to pressure pump which directs water turbine in to the liquid repository and providing stream of liquid and rotates turbine's pro-peller which gives propels to main shaft (third output shaft of gear box) which aligned on third main output shaft after centrifugal air blower, which also support to propel main shaft of In-vented device, which are connected with main invented device and or powered by off grid So-lar array system with 3 different type of specially developed Gearbox, perpetual based Fly-wheel, and Generator which produced electricity in augment form.
