(54) Title: ATTRACTION MULTILANGUAGE AUDIO DEVICE AND METHOD

(57) Abstract: A multi-language attraction communication device is provided wherein a guest selects a particular language file corresponding to an audio file coordinated with at least one entertainment activity. The communication device includes a memory for storing multiple language files for at least one entertainment activity and a processor. The processor is configured to access the memory, in response to a selected language file for the at least one entertainment activity, and to communicate the language file for review by a guest in real time coordination with the at least one entertainment activity. A method of providing audio to guests at an entertainment activity is also provided.
