(54) Title: METHODS, SYSTEM AND COMPUTER PROGRAM PRODUCT FOR DELIVERING WELL DATA

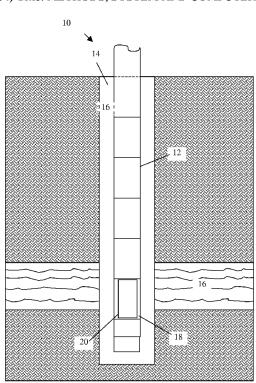

FIG. 1

(57) Abstract: A method of delivering well data is disclosed. The method includes: monitoring a host well data system by a client computer; the host well data system including at least one storage component configured to store well data therein; and determining, without requiring user interaction, whether the well data includes new well data, which includes data that has not been previously delivered to a user.

- Special categories of cited documents:
- document defining the general state of the art which is not considered to be of particular relevance
- earlier application or patent but published on or after the international filing date
- document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)
- document referring to an oral disclosure, use, exhibition or other
- document published prior to the international filing date but later than the priority date claimed
- later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
