DESCRIPTION

FIG. 1 is a top-front perspective view of a first embodiment of a cutter for a malleable compound in accordance with the present design in a fully assembled state with the plunger inserted into the cutter and the cutter mounted atop the base; FIG. 2 is a bottom-front perspective view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a front elevation view thereof;

FIG. 6 is a rear elevation view thereof;

FIG. 7 is a right side elevation view.

FIG. 8 is a right-side perspective view of the cutter for a malleable compound with the plunger above the cutter and the cutter suspended over the base in a fully exploded state; FIG. 9 is a right-side perspective view of the cutter for a malleable compound with the cutter positioned atop the base and the plunger suspended over the cutter with a malleable compound disposed within the cutter; and,

FIG. 10 is a right side perspective view of the curved cutter for a malleable compound with the plunger fully depressed into the cutter a formed malleable compound shaped by the cutter.

The broken lines in the drawings illustrate portions of the cutter for a malleable compound that form no part of the claimed design.
