(54) Title: INTEGRATED CONTACT CARD COMMUNICATION

FIG. 1

(57) Abstract: Embodiments provide integrated reply functionality within the context of a contact card or panel. Contact information is provided for display in the contact card (e.g., a portion of a user interface of a computing device). The contact information is associated with a contact. The contact information identifies one or more transport modes for communication with the contact. The computing device may receive a request from a user to communicate with the contact via at least one selected transport mode, or the transport mode may be automatically selected. Based on the received request, the computing device provides an input field within the contact card. Data from the user is received into the input field. The computing device sends the data received into the input field to the contact via the selected transport mode. The integrated reply functionality is accessible from a conversation history displayed in the contact card.

 Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
