(54) **Delivery device for automatically delivering detergent and deodorant products for water closet bowls**

(57) The present invention relates to a delivery device for automatically delivering detergent and deodorant products for water closet bowls, comprising a support element to be applied to the rim of the water closet bowl and defining coupling means for coupling a detergent and deodorant product casing.

The main feature of the invention is that the delivery device comprises, at the region thereof thereon the opening mouth of the casing bears, a pair of calibrated channels for allowing the high viscosity detergent and deodorant product to exit therefrom, which channels lead to two cups, which can be arranged at a region therethrough flushing water can pass.
