(54) Title: LOTTERY GAME

LABYRINTH

(57) Abstract: The invention refers to an entertainment telolotto game, which may find application in the entertainment industry in running lotteries, tele- or radio-quiz games and other kinds of pools "totalizer" type. The game begins after each participant has already made his/her stakes before the start with the help of telecommunication means and has entered registration data. This enables the communication-computerized system to generate individual registration numbers in the form of numeric and/or letter combination. To determine the prizes drawings are run by making use of devices for the drawing of chance numbers on a random principle. To determine the amount of the prize "maze/labyrinth" type devices are made use of. In each drawing different parts of the registered stakes are played, while over a specified period of time an additional / extra drawing is organized for winning of the accumulated jackpot for the period specified
