DESCRIPTION

FIG. 1 is a perspective view of a set of columnar power assemblies for a load elevator showing my new design;
FIG. 2 is a front elevational view of a set of columnar power assemblies of FIG. 1;
FIG. 3 and 5 are elevational views of opposite sides of the left hand columnar power assembly of FIG. 2;
FIG. 4 is a rear side elevational view of the left hand columnar power assembly of FIG. 2;
FIG. 6 is a top end view of the left hand columnar power assembly of FIG. 2;
FIG. 7 is a bottom end view of the left hand columnar power assembly of FIG. 2;
FIG. 8 and 10 are elevational views of the opposite sides of the right hand columnar power assembly of FIG. 2;
FIG. 9 is a rear side elevational view of the right hand columnar power assembly of FIG. 2;
FIG. 11 is a top end view of the right hand columnar power assembly of FIG. 2;
FIG. 12 is a lower end view of the right hand columnar power assembly of FIG. 2;
FIG. 13 is a frontal perspective view of the left hand columnar power assembly of FIG. 2 but with a corresponding runner assembly in a fully retracted position; and,
FIG. 14 is a frontal perspective view of the right hand columnar power assembly of FIG. 2 as it appears when the corresponding runner assembly is fully retracted.

The broken line showing of a load elevator platform in FIG. 1 is for illustrative purposes only and forms no part of the claimed design.
