Claim

The ornamental design for a combined junction box load controller and network bridge, as shown and described.

Description

FIG. 1 shows an exploded front perspective view of a combined junction box load controller and network bridge. FIG. 2 shows an assembled front perspective view of the combined junction box load controller and network bridge. FIG. 3 shows an exploded front elevation view of the combined junction box load controller and network bridge. FIG. 4 shows an exploded top view of the combined junction box load controller and network bridge. FIG. 5 shows an exploded bottom view of the combined junction box load controller and network bridge. FIG. 6 shows an exploded left side view of the combined junction box load controller and network bridge. FIG. 7 shows an exploded right side view of the combined junction box load controller and network bridge; and, FIG. 8 shows an exploded rear view of the combined junction box load controller and network bridge.

The broken lines in the figures depict portions of the combined junction box load controller and network bridge that form no part of the claimed design.
