(54) **Signage device**

(57) This invention refers to a place-name and/or advertising urban fixture device and a traffic signage device consisting of a substantially tubular support with two, four or more lateral support parts for lateral place-name or traffic signage plates, etc., and two top support parts for a top advertising or traffic signage plate, etc. The place-name plates, the traffic signage plates and the advertising plates can be non-luminous, luminous or illuminated. Place-name plates are generally rectangular or arrow-shaped, advertising plates can be any shape (round, polygonal or combinations thereof, etc.), whereas traffic plates have to take traffic sign shapes (circular, triangular, hexagonal, etc.); the traffic signage plates can also be light-reflecting; the device comprises support part (A), a support part (B) and a support part (C); a set of four said support parts (A) forms two lateral plate supports. However, a pair of support parts (A) can also form a plate support, and a pair of said top support parts (B) can form a top support, and a pair of said support parts (C) can form a lateral support.
