(54) Title: SINGLE AND MULTIPLE PERSON VEHICLE CAR SEATS

FIG. 11

(57) Abstract: Apparatus for single and multiple person vehicle car seats, specialized car seats, modular car seat systems, dual person car seats, variable width car seats, reversibly and non-reversibly changeable car seat types, car seat-inserts inserted into a car seat, and overlapping car seats, for use in a land, sea or air vehicle, mounted onto the vehicle's built-in seat and used for securing a car seat user, such as an infant or older child or handicapped person, within a vehicle's regular seating positions. Car seat systems include components enabling addition or removal of seating positions for a desired number of car seat users as needed, limited only by available width space of the vehicle seat onto which it is mounted. Car seat systems and/or multiple person car seats generally provide more and/or specialized seating positions for persons in car seats than provided for regular passengers in the vehicle width space taken up by the car seat systems or the multiple person car seat.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
