(54) Schock-absorbing sole for shoes

(57) A sole for shoes having shock-absorbing properties, comprising an upper sole (2) which is rigidly coupled to an upper (4) and forms, in a downward region, a seat for a tread sole (3), inside which the tread sole is accommodated and movably retained, so that it can perform strokes towards and away from the upper sole (2), elastic shock-absorbing means (8) being interposed between the upper sole and the tread sole and being suitable to repel the upper sole (2) into a spaced position with respect to the tread sole (3).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
