Atlys.
To all whom it may concern:

Be it known that we, GEORGE M. PROCTOR and WILLIAM A. PROCTOR, citizens of the United States, residing at Westfield, in the county of Hampden and State of Massachusetts, have invented and produced a new and original Design for Towel-Rack Cases, of which the following is a specification, reference being had to the accompanying drawing, showing one of said cases.

The drawing is a perspective view of a towel-rack case and fully illustrates our design therefor.

The leading feature of our design consists of a longitudinally-tapering form for said case, having the front borders of the walls thereof scalloped, as shown.

A is the upper wall and B is the lower wall of the case. D D are the front borders of the said walls, and on said borders are formed a series of scallops or convex rounded lobes c.

F indicates the wide and E the narrow end of the case, and the latter for ornamental purposes has the rectangular openings d d in the said end F and the pentagonal openings h h h in the upper wall A, thereby producing a light and airy effect and adding to the general ornamental design of the case.

What we claim is—

The design for a towel-rack case, substantially as herein shown and described.

GEORGE M. PROCTOR.
WILLIAM A. PROCTOR.
