(54) Title: METHOD AND APPARATUS FOR SELECTING TRANSMISSION MODULATION RATES IN WIRELESS DEVICES FOR A/V STREAMING APPLICATIONS

(57) Abstract: A method, system, and computer-readable medium for providing supplementary information within a web page rendered by a user's browser are provided. The method includes generating at least one search result satisfying a user request and generating a visit parameter set in response to the request. The method also includes augmenting the visit parameter set with at least one target parameter extracted from the search result to create an augmented visit parameter set. The method further includes providing supplementary information for rendering by the user's browser that is selected based on the augmented visit parameter set.
