For technical reasons, its content and layout may differ from that of the original publication. Only the original published information is legally binding.

SUPPLEMENTARY EUROPEAN SEARCH REPORT

Application number:
EP 16 86 37 61

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-3, 6-13(completely); 14(partially)

Neutral zone providing a neutral input which causes a controller to provide no feedback to the user.

2. claims: 4(completely); 14(partially)

Neutral zone providing a neutral input which causes a controller to provide feedback to the user indicating that the user is on the neutral zone.

3. claim: 5

Neutral zone providing a neutral input which causes a controller to provide feedback to the user indicating the user's cadence level.

4. claim: 15

Mount for a gaming device, the mount comprising a flexible rod mounted to a trampoline.

None of the further search fees have been paid within the fixed time limit. The present (supplementary) European search report has been drawn up for those parts of the European patent application which relate to the first mentioned in the claims, namely claims: 1-3, 6-13(completely); 14(partially)

The supplementary search report has been based on the last set of claims valid and available at the start of the search.
