(54) Title: CARD GAME WITH CARD EXCHANGE FEATURE

(57) Abstract: A card game includes a card exchange feature. In a poker variation, a dealer is dealt an initial hand and a player is dealt an initial hand. The player is permitted to elect to exchange none, one or more or all of the cards in their hand with cards from the dealer's hand. Elected cards are then exchanged with the dealer's hand and a final player and a final dealer hand are formed from the original hands as modified by any exchanged cards. The rank of the player's final hand is then compared to the rank of the dealer's final hand and the player's hand is declared to be the winner if it outranks the dealer's hand.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
