(54) Title: CALLER-CALLEE ASSOCIATION OF A PLURALITY OF NETWORKED DEVICES

(57) Abstract: The present disclosure generally relates to systems and methods for establishing and maintaining communication between two or more communication devices (10, 60) coupled to communication networks (31). Some specific aspects relate to communication between a plurality of communication devices (10, 60) each of which is coupled to a respective network (31). Other aspects relate to establishing such communication by way of contact lists maintained and facilitated on systems coupled to the networks (31). Users of multiple communication networks (31), such as VoIP, PSTN and wireless, employ multiple communication devices to communicate with their contacts. For example, a VoIP enabled computer is necessary to access contacts on a VoIP network (31) and a mobile or cellular telephone (60) is used to access contacts on wireless and PSTN networks (51). A contact list, stored on one communication device (10, 60), in some instances, cannot be accessed from another communication device (10, 60). For example, a contact list stored in a VoIP enabled computer cannot be accessed from PSTN or wireless phone devices (60).

INTERNATIONAL SEARCH REPORT

International application No

PCT/US2006/019135

A. CLASSIFICATION OF SUBJECT MATTER

INV. H04L29/06

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, INSPEC, COMPENDEX, PAJ, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	<p>GRIFFIN D ET AL: "Integrating SIP, presence and FTP to provide wireless multimedia messaging" WIRELESS COMMUNICATIONS AND NETWORKING CONFERENCE, 2004. WCNC. 2004 IEEE ATLANTA, GA, USA 21-25 MARCH 2004, PISCATAWAY, NJ, USA, IEEE, vol. 4, 21 March 2004 (2004-03-21), pages 2581-2586, XP010708512 ISBN: 0-7803-8344-3 page 2581, left-hand column, line 23 - line 34 page 2582, right-hand column, line 1 - page 2583, left-hand column, line 13 page 2583, right-hand column, line 25 - page 2584, left-hand column, line 12; figures 2-4</p> <p style="text-align: center;">----- -/--</p>	1-15, 53-61

 Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2006/019135

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:

3. Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- The additional search fees were accompanied by the applicant's protest.
- No protest accompanied the payment of additional search fees.

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-15,53-61

METHOD FOR ESTABLISHING A COMMUNICATION USING AN
ALPHANUMERIC CODE

2. claims: 16-52

METHOD FOR A CONTACTS LIST AVAILABLE
