METHOD AND SYSTEM FOR TOKEN-BASED AUTHENTICATION

Abstract: The disclosure relates to authenticating a secondary communication channel (106) between a client application (101) and a server application (102) when an authenticated primary communication channel (104) has already been established between the client application and a resource application (103), on which the server application can store (124) a generated authentication token (143) that only privileged users including the client application user can read-access (127,128) and send back (129) to the server application by way of the secondary communication channel.
INTERNATIONAL SEARCH REPORT

International application No
PCT/EP2009/064052

A. CLASSIFICATION OF SUBJECT MATTER

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
H04L G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category*</th>
<th>Citation of document, with indication of relevant passages</th>
<th>Relevant to claim No</th>
</tr>
</thead>
</table>

X Further documents are listed in the continuation of Box C

X See patent family annex

* Special categories of cited documents
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier document but published on or after the international filing date
  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to an oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed
  "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  "X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  "Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents such combination being obvious to a person skilled in the art
  "&" document member of the same patent family

Date of the actual completion of the international search

30 August 2010

Date of mailing of the international search report

09/09/2010

Name and mailing address of the ISA/
