(54) Title: SYSTEM AND METHOD FOR REGISTERING ATTENDANCE OF ENTITIES ASSOCIATED WITH CONTENT CREATION

(57) Abstract: A system and method for registering or otherwise associating items with generated content. Identification of who and/or what is present in connection with the generation of content is determined. In one embodiment, images, video, audio, or other media/multimedia content is generated (112, 114, 116), and the items (120, 124, 128, 132, 136) and/or people (204) present and relevant to the creation of that content are determined. A record (216) of those relevant items and/or people may then be associated with that created content, so that the content includes a record of who/what was there when the content was created.
