**Claim**

The ornamental design for a part of spectacle frames, as shown and described.

**Description**

**Fig. 1** is a frontal perspective view of a part of spectacle frames showing my new design;

**Fig. 2** is a front view thereof;

**Fig. 3** is a first side view thereof;

**Fig. 4** is a second side view thereof;

**Fig. 5** is a rear view thereof;

**Fig. 6** is a top view thereof;

**Fig. 7** is a bottom view thereof; and,

**Fig. 8** is an enlarged particular view thereof.

The part of spectacle frames has a layer of fabric, in particular of denim fabric, fixed frontally on the support body of the frames, with raw cut edges that remain laterally visible. Since the layer of fabric is not completely embedded in the support body, it defines a touchable frontal surface on the frames.
