(54) Title: A STRUCTURE FOR RETAINING A LOCKING PIN

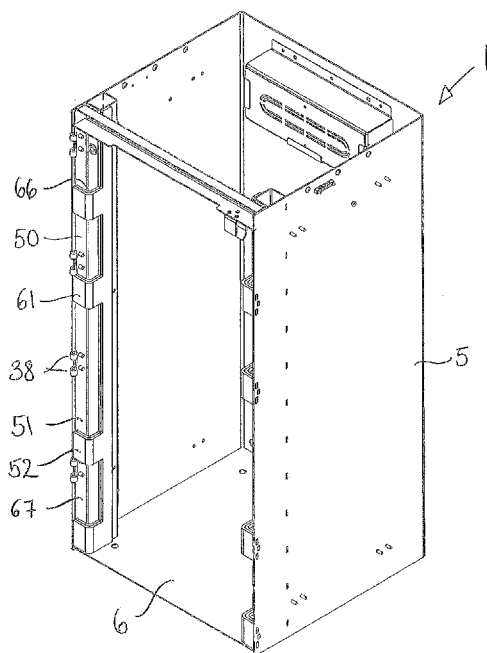

FIGURE 6

(57) Abstract: The structure (50) comprises a wall (4), a first elongate component (51) and a second elongate component (52). The first elongate component (51) comprises a length of sheet material having a first bend directly connecting a first panel (53) to a second panel (54). The second elongate component (52) comprises a sheet material having a planar part (60) and one or more limbs (61) extending from the planar part (60). Each limb (61) includes a respective bend at a location along the length of the limb (61). A face of the planar part (60) is secured against a face of the second panel (54). Ends of each limb (61) furthest from the planar part (60) are secured against the wall (4), and an edge of the first panel (53) that is opposite to the first bend is secured against the wall (4) at a location separated from the limb (61).
