CLAIM

The ornamental design for an “aircraft cockpit throttle console,” as shown and described.

DESCRIPTION

This application may be deemed related to commonly owned copending U.S. Design patent application Ser. No. 29/324, 987 entitled “Aircraft Control Panel” and filed even date herewith, which application is expressly incorporated hereinto by reference.

FIG. 1 is a top left side perspective view of an aircraft cockpit throttle console which embodies my new and original design therefore;

FIG. 2 is a front elevation view thereof, the rear elevation view being unornamented;

FIG. 3 is a top plan view thereof, the bottom plan view being unornamented, wherein the broken lines in FIG. 3 represent console components, such as switches, knobs, annunciators, handles and the like, which are in the environment of the claimed design, but which do not form part of the claimed design; and,

FIG. 4 is a right side elevation view thereof, the left side elevation view being essentially a mirror image thereof.

The aircraft cockpit throttle console is shown on an enlarged scale in FIGS. 2-4.
