(54) **display carton**

(57) A case 10 for containment and display of goods comprises a main flap 2 which can be secured in a closed position so as to retain the case contents during transit, the main flap 2 also being securable in a partially open position at an angle to an adjacent side 12 of the case, so that, with that adjacent side oriented to form a

base of the case, the angled main flap retains loose contents against spillage from the case and forms an opening for display of contents; characterised in that side flaps 1 are provided on two case sides 11 neighbouring said adjacent side 12, the side flaps having locking features 6, 7 for securing them to the main flap 2 with the main flap in the partially open position.
