(54) **A connector device for transferring data recorded by a digital tachograph**

(57) The device comprises an electrical cable covered with a sheath (41), with a plug (43) for electrical connection to a socket located on an accessible face of a tachograph (10), a connector (45) for connection to an electronic processing and transmission controller (20),

and two pins (46) fixed to the sheath (41) and spaced apart from the plug (43). The pins (46) can be connected to corresponding connection points on the tachograph in such a way as to keep the cable tidily adjacent to the front face of the tachograph without covering its controls or display units.
