(54) Title: SYSTEM FOR MANAGING A GAME CONTROLLER DEVICE FOR ELECTRONIC TRADING

(57) Abstract: According to one embodiment, a system for electronic trading is provided. A plurality of controller signal relationships are stored, each controller signal relationship associating one or more game controller signals with a trading system command associated with the electronic trading of financial instruments via a trading platform. One or more game controller signals generated by a game controller are received and at least one of the plurality of controller signal relationships is modified based at least on the one or more received game controller signals.
