(54) Title: PROVISIONING A USER DEVICE FOR MULTIPLE SERVICES

(57) Abstract: Systems and methods for provisioning an electronic device for multiple services are disclosed herein. An exemplary embodiment, among others, of a provisioning method includes receiving a first request to procure a user device capable of operating under a plurality of service plans. The method also includes receiving a second request to provision the user device for operation under a first service plan and receiving a third request to provision the user device for operation under a second service plan. Also, the method includes coordinating the first request, second request, and third request to provision the user device under the first service plan and second service plan.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
