UNITED STATES PATENT OFFICE.

HARRY G. PRICE, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR A LOCK-CLASP.

SPECIFICATION forming part of Design No. 28,867, dated June 14, 1898.

Application filed May 13, 1898. Serial No. 680,641. Term of patent 14 years.

To all whom it may concern:

Be it known that I, HARRY G. PRICE, a citizen of the United States, residing at the city of Philadelphia, in the county of Philadelphia and State of Pennsylvania, have invented and produced a new and original Design for a Lock-Clasp, of which the following is a specification, reference being had to the accompanying drawings, forming part hereof, in which—

Figure 1 is a front elevation of the lock-clasp embodying the features of my design, and Fig. 2 is a top or plan view of the same.

The leading feature of my design consists of the unitary structure made the subject of illustration, having the shape or configuration shown.

Referring to the drawings, A represents the lock-clasp, consisting of the body portion a , terminating in the gooseneck end a' , which is

provided with an inclined slit a^2 , merging into a substantially ovate opening a^3 in the body of the gooseneck end a' . The upper end of the body of the clasp is provided with shoulders b and b' on each side, which are slightly bent or curved in the direction of the front of the clasp, as illustrated in Fig. 2 of the drawings.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a lock-clasp, substantially as shown and described.

In testimony whereof I have hereunto set my signature in the presence of two subscribing witnesses.

HARRY G. PRICE.
