ATTORNEYS.
To all whom it may concern:

Be it known that I, AUGUST KNIPPENBERG, of Ichtershausen, Thuringen, Germany, have invented and produced a new and original Design for a Hair-Pin, of which the following is a full, clear, and exact specification.

Reference is to be had to the accompanying drawing, forming a part of this specification, in which the figure is a perspective view of a hair-pin showing my design.

The leading feature of my design consists in the flat shanks A, corrugated in a transverse direction through a portion of their length, the corrugations running lengthwise of the flat faces of the shanks with the side edges of the shanks parallel to each other.

Other features of the design are the cylindrical terminals C of the shank A, and the roughened faces D of the U-shaped bend of the hair-pin.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

The design for a hair-pin as herein shown and described.

AUGUST KNIPPENBERG.
