CLAIM

The ornamental design for basket with wood splints and nylon webbing, as shown and described.

DESCRIPTION

FIG. 1 provides a perspective view illustration of the embodiment.
FIG. 2 provides a front view illustration of the embodiment.
FIG. 3 provides a rear view illustration of the embodiment.
FIG. 4 provides a left view illustration of the embodiment.
FIG. 5 provides a right view illustration of the embodiment.
FIG. 6 provides a top view illustration of the embodiment; and,
FIG. 7 provides a bottom view illustration of the embodiment.

As shown in each of the figures, the ornamental appearance may be produced by the vertical unshaded splints having the appearance of wood (such as, for example, splints made from wood) and the shaded horizontal weaving having the appearance of nylon webbing (such as, for example, seat-belt material).
