(54) **Title:** PRODUCT EDUCATION TOOL

FIG. 3

(57) **Abstract:** A disposable absorbent article system includes a disposable absorbent article having a liner, an article absorbent core, and an article reactive mechanism configured to produce a result upon exposure to an insult; and an article simulator having a substrate and a simulator reactive mechanism configured to produce the result upon exposure to a simulant, the article simulator having fewer components than the absorbent article. A method for facilitating training includes providing an article simulator having a substrate and a simulator reactive mechanism configured to produce a simulator result upon exposure to a simulant, wherein the simulator result simulates an article result obtained from an insult to a disposable absorbent article having an article reactive mechanism, and wherein the article simulator has fewer components than the absorbent article.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
