Safety pallet-drum assembly system for transport of dangerous materials.

Integrated pallet/drum system as device for safe handling, transportation and storage of water and/or soil contaminating dangerous liquids. The pallet is provided with integrated side-walls (2) extending from the pallet base (4) upwardly and forming a basin for drums (6) positioned on the pallet base (4) wherein the side-walls (2) have such a height that the safety basin is capable of storing the entire content of the drums (6) in case of leakage. To allow stacking of the device corner posts (3) are provided, the upper ends thereof are connected to each other forming an open cage to receive the integrated drums (6) completely. This embodiment allows the stacking of the devices.

**CATEGORY OF CITED DOCUMENTS**

X: particularly relevant if taken alone
Y: particularly relevant if combined with another document of the same category
A: technological background
O: non-written disclosure
P: intermediate document
T: theory or principle underlying the invention
E: earlier patent document, but published on, or after the filing date
D: document cited in the application
L: document cited for other reasons
&: member of the same patent family, corresponding document
The present European patent application comprised at the time of filing more than ten claims.

- All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid.

name claims:
- No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions.

namely:

1. Claims 1-8: Apparatus comprising pallet and drums, characterised by features relating to the pallet
2. Claims 1,9,10,11: Apparatus comprising pallet and drums, characterised by features relating to the drums

- All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid.

name claims:
- None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims.

name claims:
