Design.
W. H. Betts.
Sole protector.
Application filed July 11, 1919.

54,718.

Inventor:
William H. Betts.

By Edward F. Longan
Att'y.
To all whom it may concern:

Be it known that I, WILLIAM H. BETTS, a citizen of the United States, residing at St. Louis, Missouri, have invented a new, original, and ornamental Design for Sole-Proectors, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof, in which—

Figure 1 is an enlarged top plan view of a sole protector embodying my invention; Fig. 2 is the side elevation of the same; Fig. 3 is an end elevation.

The leading feature of my design consists of the employment of a substantially elliptical body portion 4 which is provided with a series of substantially V shaped grooves 5, thus dividing the substantially elliptical body shaped portion 4 into a series of diamond shaped portions or bodies 6.

Another leading feature of my design is to provide the body portion of 4 with integral tapered and curved projections 7. These projections gradually tapering and curving from the head 4 to their points. These projections are rectangular in end elevation as illustrated in Fig. 3.

I claim:

The ornamental design for a sole protector as shown and described.

In testimony whereof, I have signed my name to this specification, in presence of two subscribing witnesses.

WILLIAM H. BETTS.

Witnesses:

WALTER C. STEIN,

EDWARD E. Langan.
