(51) International Patent Classification:
A61N 1/40 (2006.01) H03K 7/06 (2006.01)

(21) International Application Number:
PCT/US2015/033965

(22) International Filing Date:
3 June 2015 (03.06.2015)

(25) Filing Language: English

(30) Priority Data:
62/007,145 3 June 2014 (03.06.2014) US

(71) Applicant: ADVANCED BIOTECHNOLOGIES, LLC [US/US]; 199 Blueberry Pond Drive, Brewster, MA 02660 (US).

(72) Inventors: LAW, James, William; 199 Blueberry Pond Drive, Brewster, MA 02660 (US). GIRARD, James, David; 2114 Main Street, Brewster, MA 02631 (US). BESTER, Colin; 2505 W Fitzhugh Road, Dripping Springs, 78620 (US).

(74) Agents: WADEKAR, Suhrid et al; Goodwin Procter LLP, Exchange Place, Boston, MA 02109 (US).

Published:
— with international search report (Art. 21(3))
— before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments (Rule 48.2(h))

(54) Title: SYSTEM AND METHOD OF GENERATING HIGH VOLTAGE VARIABLE FREQUENCY ELECTROMAGNETIC RADIATION

(57) Abstract: In a high voltage, variable frequency radiation generation system, a carrier signal supplied to a primary coil of a transformer is varied, e.g., turned ON and OFF at variable frequencies. The ON duration and/or the average amplitude of the carrier signal may also be varied. Moreover, the carrier signal may be modulated using an audio signal. The parameters to control the variation of the carrier can be provided as a recipe via a software application. A server can provide different types of apps providing different control features. The server may also collect user characteristic data and recipe usage data, and may facilitate exchange of these data and may recommend recipes based on a particular user characteristic.
Date of publication of the international search report:
21 January 2016
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER

A61N1/40
H03K7/06

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
A61N H03K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category</th>
<th>Citation of document, with indication, where appropriate, of the relevant passages</th>
<th>Relevant to claim No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>US 3 600 604 A (THORNE-BOOTH GEORGE M) 17 August 1971 (1971-08-17) the whole document</td>

Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents:
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O" document referring to an oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed

'*' later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"*" document member of the same patent family

Date of the actual completion of the international search: 26 November 2015
Date of mailing of the international search report: 02/12/2015

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-15
   Electromagnetic radiation generating system with a switch
   ___

2. claims: 16-19
   Electromagnetic radiation generating system with a variable DC power supply
   ___

3. claims: 20-33
   Controller for controlling an electromagnetic radiation generating system
   ___

4. claims: 34-38
   Method for generating electromagnetic radiation with carrier modulation
   ___

5. claims: 39-45
   Method for delivering electromagnetic radiation to a subject with gas filled tubes
   ___

6. claims: 46-53
   Computer implemented method of analyzing receipts
   ___

7. claims: 54-62
   Computer implemented method of exchanging receipts
   ___

8. claims: 63-71
   Computer system for transmitting web-enabled user interface to a web enabled user device
   ___
**INTERNATIONAL SEARCH REPORT**

**Box No. II  Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
   because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
   because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
   because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box No. III  Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

```
see additional sheet
```

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☑ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-15

**Remark on Protest**

☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.

☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.

☐ No protest accompanied the payment of additional search fees.

Form PCT/ISA/21 0 (continuation of first sheet (2)) (April 2005)
