(54) Title: SYSTEM AND METHOD FOR PROVIDING CUSTOMIZED RESPONSE MESSAGES BASED ON REQUESTED WEBSITE

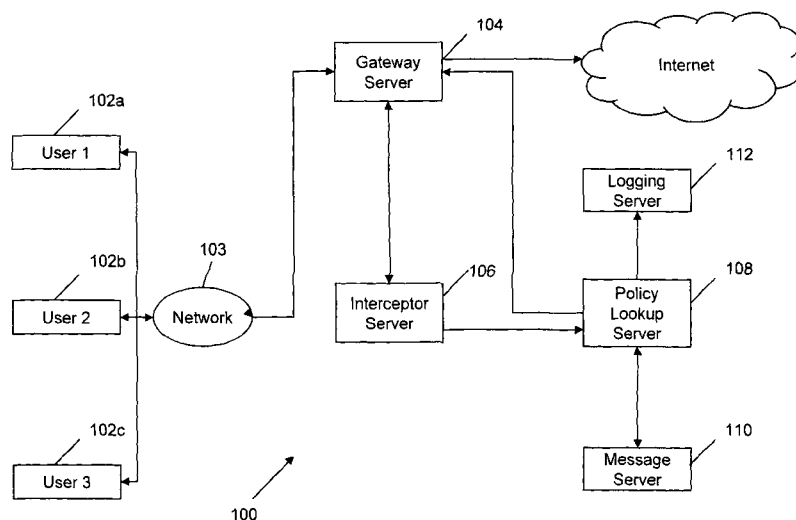

FIG. 1

(57) Abstract: The invention describes a system, method and computer product to regulate user access to websites over the Internet. The system receives a URL request corresponding to a website that a user wishes to access. Thereafter, the system determines an associated group for the user and an associated category of the website. Subsequently, a customized advisory message is generated based on the user's access level credentials, a category identifier of the requested website and a message policy. The advisory message is included in a block page and then displayed to the user.
