(54) Title: TRACKING THE ORIGINS OF DATA AND CONTROLLING DATA TRANSMISSION

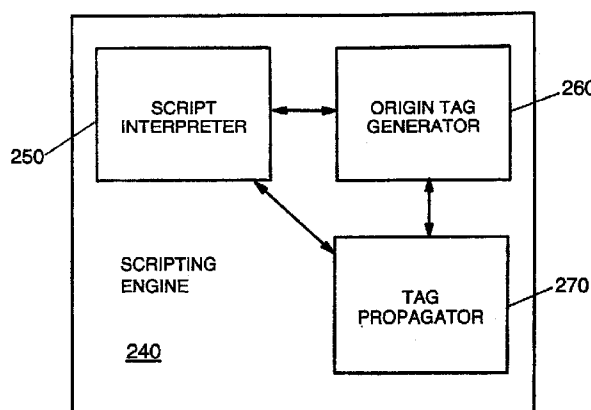

FIG. 3

(57) **Abstract:** Provided are methods, apparatus and computer programs for tracking the origins of data and controlling transmission of the data. In one embodiment, transmission of sensitive data by script operations is limited, to prevent transmission to any network location other than to the source of that sensitive data, by a new function within a scripting engine of an HTTP client that is responsive to origin tags placed within the data. Origin tags that are associated with data inputs are propagated to any output data items, so that transmission of derived information can also be controlled.

INTERNATIONAL SEARCH REPORT

International application No

PCT/EP2008/060289

A. CLASSIFICATION OF SUBJECT MATTER
 INV. H04L29/06 G06F21/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
 H04L G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

See patent family annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
