CLAIM

The ornamental design for an adjustable stabilizing brace for reducing wear on the suspension system of motorcycle while being transported, as shown and described.

DESCRIPTION

FIG. 1 is a top front perspective view of my new design for an adjustable stabilizing brace for reducing wear on the suspension system of motorcycle while being transported;

FIG. 2 is a top plan view thereof;

FIG. 3 is a bottom plan view thereof;

FIG. 4 is a bottom front perspective view thereof in inverted position;

FIG. 5 is a front elevation view thereof, on a reduce scale, it being understood that the broken lines are for illustrative purposes only and form no part of the claimed design;

FIG. 6 is a front elevation view thereof, the rear view being a mirror image of that shown; and

FIG. 7 is a side elevation view thereof, the opposite side being a mirror image of that shown.
