(54) Title: DEVICE FOR COORDINATING ILLUMINATION AND SOUND

FIG. 1

(57) Abstract: The illumination of a display of a religious, meditative, or ceremonial image is coordinated with sound produced and associated with the use of the image, such as a chant associated with the image. The sound can be produced by the device of the invention in which case the device coordinates the illumination with the sound produced by the device, or the sound can be produced by a user of the device in which case the device coordinates the illumination with the sound produced by the user. The device includes a display for illuminating and displaying the visual image and circuitry for coordinating the illumination of the visual image and the sound associated with use of the image.
