(54) **Title:** SUBJECT MATTER RESOURCE WEBSITE

**FIG. i**

(57) **Abstract:** A method and apparatus for providing searchable data. The method includes the steps of detecting a content capture request from a user and analyzing a screen being viewed by the user to capture a content and format of any information elements displayed on the screen. The method further includes the steps of prompting the user for descriptive information about the viewed content and saving the captured content and format and descriptive information as a subject matter resource within a subject matter resource file located at a predetermined website or physical location on the user's computer.
