(54) **Title:** MONITORING SYSTEM FOR A MEDICAL LIQUID DISPENSING DEVICE

Figure 1

(57) **Abstract:** The present invention is concerned with monitoring systems (1) for medical liquid dispensing devices. The systems are intended for use in any medical setting wherein a medical liquid container (4), such as an infusion bag with fluid, is to be infused into a patient and are aimed at reducing the need for visual checking by nurses or other medical assistants. This is achieved by a combination of an identification unit (2), which identifies a medical liquid container and optionally the patient to be treated, a weight monitoring unit, which measures the weight of the medical liquid container when liquid is dispensed therefrom, and a processing unit (3), which processes and/or stores data that are acquired from the identification unit and the weight monitoring unit.

A. CLASSIFICATION OF SUBJECT MATTER
INV. A61M5/14 A61M5/168
ADD.
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
A61M
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
