(54) Title: METHOD AND SYSTEM FOR PROVIDING ELECTRONIC INFORMATION FOR MULTI-MARKET
ELECTRONIC TRADING

(57) Abstract: A method and system for providing electronic information for multi-market electronic trading. The method and system dramatically improve an infrastructure used by electronic traders over a communications network (18) by separating one or more data streams from one or more trading exchange (22) with plural different types of electronic trading (22) information into plural separate data streams that can be selected and displayed by a user on a target device. The plural separate data streams and can be requested, displayed and used faster and more efficiently than an entire data stream including all the multiple types of electronic trading information (22).
