(54) Title: VOICE MESSAGING

(57) Abstract: A method of administering a voice messaging facility associated with a telecommunication subscriber is provided which includes the steps of establishing a stored telephone directory of potential callers to the telecommunication subscriber; categorising the potential callers in the stored telephone directory into a plurality of caller groups and providing a different audible message corresponding to each caller group, each one of the different audible messages being activatable when an incoming call from anyone of the potential callers in the corresponding caller group is diverted to the voice messaging facility. A telecommunication network making use of the above method is also provided.
