(54) **Title:** METHOD FOR PROVIDING ALIAS FOLDERS IN A DOCUMENT MANAGEMENT SYSTEM

(57) **Abstract:** Interactive collaboration within a secure, server-based social community integrated with a secured document management system that includes at least one of a plurality of professional functionalities and a plurality of integrative functionalities to members having a member virtual identity within the community. Members of the community may create a personalized custom set of folders within the document management system, which customized arrangement allows the members to view documents, files, and folders as they desire. By creating these personalized custom "alias" folders, the members rearrange folders to be more accessible to themselves, while leaving the actual files and folders unchanged as viewed by every other member of the community. Members or a network administrator may also grant permission to other members of the network to access alias folders of each other member.
