(54) Title: AUTOMATIC WEBSITE GENERATOR

(57) Abstract: A system and method for the automatic generation of a website. The website is created upon a user request, where the user provides identification information that is used to search an information database. The information will provide a reference to a code that relates to a template that is used to specify the layout, style and content of the website that is to be generated, and the website is then generated in accordance with the structure of the template, based on content contained in the information database. The user may engage the system and method by means of e-mail or a dedicated website or other such suitable means.
