(54) A system for use in Jacquard machines.

(57) A system for use in jacquard machines and the like, including a large number of yarn guiding means, sinkers, healds, needles or the like actuatable by selection means and operating means and are movable between predetermined positions.

The novelty resides in the feature that the yarn guiding means, the sinkers, the healds, the needles or the like (2) are adapted when reaching predetermined positions to come into engagement with spring means (8, 9) to be stretched so that a section of the yarn guiding means or the like situated between the spring means and an engaging operating means is kept stretched.
