(54) **Name bearing plate with locking elements for quickly locking outer push-buttons**

(57) The present invention relates to a name-bearing plate including locking elements for quickly locking outer push-buttons, which comprises a plate body having a plurality of windows for name bearing glass elements, with adjoining holes for push-button elements.

The main feature of the invention is that the name bearing glass elements define quick-coupling means for locking the body of the push-button.
