No. 766,763. PATENTED AUG. 2, 1904.

W. E. JUDGE.

DAILY ENGAGEMENT CALENDAR.

APPLICATION FILED JAN. 26, 1904.

NO MODEL.

Sundays in January, 1904. ENGAGEMENTS.	
1st Sunday the 3rd day.	
2nd Sunday the 10th day.	
3rd Sunday the 17th day.	
4th Sunday the 24th day.	
5th Sunday the 31st day.	

FIG. 1.

Mondays in January, 1904. ENGAGEMENTS.	
1st Monday the 4th day.	
2nd Monday the 11th day.	
3rd Monday the 18th day.	
4th Monday the 25th day.	
	NOTES.

FIG. 2.

Tuesdays in January, 1904. ENGAGEMENTS.	
1st Tuesday the 5th day.	
2nd Tuesday the 12th day.	
3rd Tuesday the 19th day.	
4th Tuesday the 26th day.	
	NOTES.

FIG. 3.

Wednesdays in January, 1904. ENGAGEMENTS.	
1st Wednesday the 6th day.	
2nd Wednesday the 13th day.	
3rd Wednesday the 20th day.	
4th Wednesday the 27th day.	
	NOTES.

FIG. 4.

Thursdays in January, 1904. ENGAGEMENTS.	
1st Thursday the 7th day.	
2nd Thursday the 14th day.	
3rd Thursday the 21st day.	
4th Thursday the 28th day.	
	NOTES.

FIG. 5.

Fridays in January 1904. ENGAGEMENTS.	
1st Friday the 1st day.	
2nd Friday the 8th day.	
3rd Friday the 15th day.	
4th Friday the 22nd day.	
5th Friday the 29th day.	

FIG. 6.

Saturdays in January, 1904. ENGAGEMENTS.	
1st Saturday the 2nd day.	
2nd Saturday the 9th day.	
3rd Saturday the 16th day.	
4th Saturday the 23rd day.	
5th Saturday the 30th day.

Attorney.

No. 766,763. Patented August 2, 1904.

UNITED STATES PATENT OFFICE.

WINIFRED E. JUDGE, OF NEW YORK, N. Y.

DAILY-ENGAGEMENT CALENDAR.

SPECIFICATION forming part of Letters Patent No. 766,763, dated August 2, 1904.

Application filed January 26, 1904. Serial No. 190,661. (No model.)

To all whom it may concern:

Be it known that I, WINIFRED E. JUDGE, a citizen of the United States, residing at New York, in the county of New York and State of New York, have invented certain new and useful Improvements in Daily-Engagement Calendars, of which the following is a specification, reference being had therein to the accompanying drawings.

In the accompanying drawings, Figures 1, 2, 3, 4, 5, 6, and 7 are plan views of seven of the pages or sheets of my improved calendar; and Fig. 8 is a perspective view of a book made up of such calendar-sheets.

My invention relates to calendars for recording social or business engagements; and it consists of the novel arrangement of the names of the days upon the calendar, together with a space opposite each day formed by suitably-ruled lines or other distinguishing device and adapted to contain memoranda of engagements.

In the seven sheets or pages *a* of my improved calendar illustrated in the drawings I give my novel and useful arrangement of days and dates for the month of January, 1904. In Fig. 1 I show a page or sheet devoted to the Sundays of said month, five in number, all arranged in a vertical column on the left-hand side of the page or sheet, each one given its proper date in the month. At the top of the page or sheet is displayed the name of the month and the year. Above and below each of the Sundays named is a horizontal line *b*, extending across the page or sheet. Thus there is left a vertical column of blank spaces *c* on the right-hand side of the column of Sundays, which spaces are separated from each other by the horizontal lines and from the column of days by a vertical line *d*. Above this column of blank rectangular spaces is printed the word "Engagements." In Fig. 2 the Mondays of the month are similarly arranged, with corresponding spaces *c* opposite each of them to the right; in Fig. 3, the Tuesdays; in Fig. 4, the Wednesdays; in Fig. 5, the Thursdays; in Fig. 6, the Fridays, and in Fig. 7 the Saturdays. The days of the succeeding calendar months are similarly grouped, with like blank spaces arranged in the same manner. These sheets or pages may be bound together in a book form *e*, as shown in Fig. 8, or they may be loose sheets, and they may contain only the days of like name in a month, or groups of prints representing respective sheets for a plurality of divisions may be combined on larger sheets, as shown in Figs. 1 to 7 of the drawings.

The novelty of this invention consists in giving separate series of the days of the week having the same name and providing for each day of such series a blank engagement-space properly separated or marked off by ruled lines, so that the engagements or memoranda pertaining to any one day are separate and distinct from those of the next preceding or next succeeding day.

I claim as a novel and useful invention and desire to secure by Letters Patent—

The improved daily-engagement calendar consisting of homogeneous sheets respectively having thereon in vertical columns the names and dates of the week-days of the month which are the same, with contiguous blank spaces adjoining said names, one for each day.

In testimony whereof I affix my signature in the presence of two witnesses.

WINIFRED E. JUDGE.
