BACKGROUND

[0003] 1. Field of Invention

[0004] This invention relates to anti-fatigue shoe attachments, specifically to such attachments for added comfort to the user’s primary footwear.

[0005] 2. Description of Prior Art

[0006] Shoe manufacturers make many varieties and variations in footwear for consumers. However, there are no temporary removable extra comfort sole attachments for the consumer who walks and or stands for long durations.

SUMMARY

[0007] In accordance with the present invention a flexible anti-fatigue sole which by a variety of means is integrated with a releasable securement apparatus to be attached to the user’s primary footwear.

[0008] The objects and advantages of the removable anti-fatigue sole enhancer are:

[0009] (a) To provide added sole comfort to the user’s primary footwear.

[0010] (b) To provide a removable sole attachment that can be interchanged with a variety of the user’s primary footwear.

[0011] (c) To provide a sole attachment which can be used easily and conveniently.

[0012] (d) To provide the consumer who may have specific orthopedic needs the added comfort to their primary footwear.

[0013] (e) To provide an alternative to anti-fatigue floor mats that are often impractical and or too costly.
